

Driveway shot

Driveway as you can see the camera starts recording only when the vehicle is already midway on the driveway even though the activity zone is much bigger

[My Devices](#) | [Driveway Camera Settings](#) | [Video Settings](#)

ADJUST IMAGE AND ACTIVITY ZONES

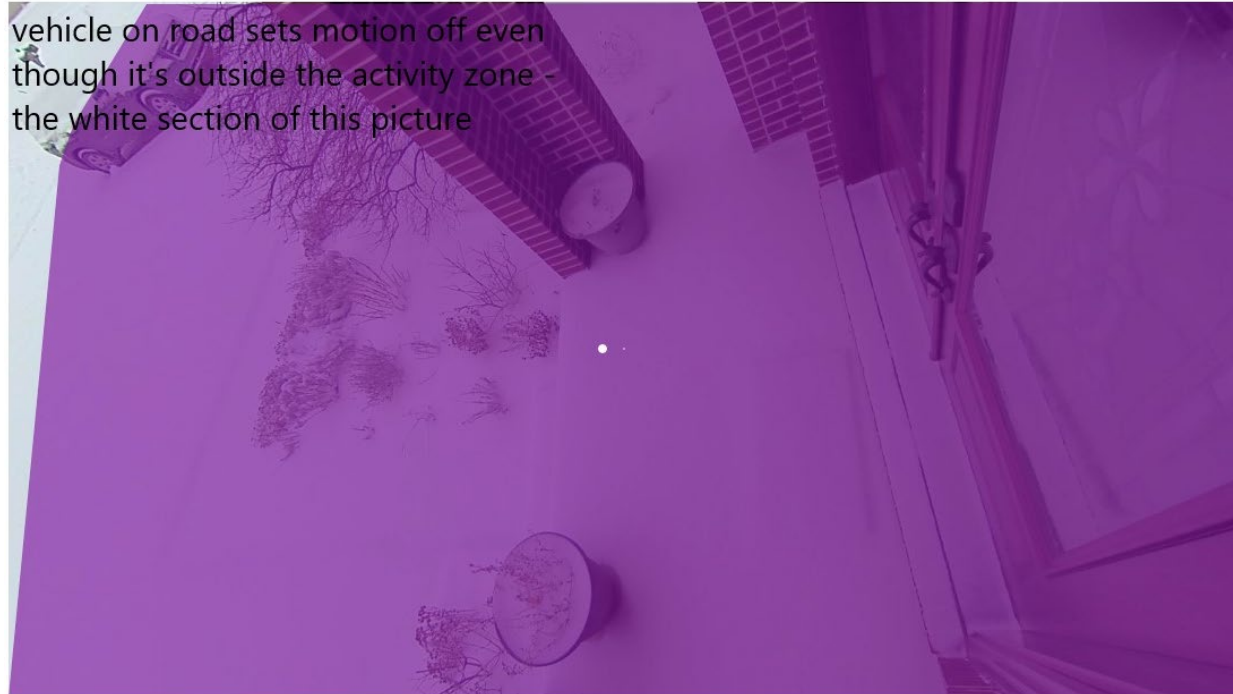

And unlike in the front door zone here the camera does not capture the vehicle outside the activity zone (white space in the top left corner)

Front Door:

Here you can see the vehicle going across the road in the top left corner which triggers the motion detection even though it is well outside the activity zone

Front door activity zone:

As you can see the smart notifications for vehicles is turned off and still it goes on for my front door motion of vehicle outside the activity zone

Manage Arlo Smart | **Frontdoor Camera** ?

Arlo Smart is active on this camera and you will receive Smart Alerts based on your notification settings. For the best experience we recommend turning ON smart notifications.

Motion Alerts

People	<input checked="" type="checkbox"/>
Vehicles	<input type="checkbox"/>
Animals	<input checked="" type="checkbox"/>
All Other Motion	<input checked="" type="checkbox"/>

Audio Alerts

Smoke/CO Alarm	<input type="checkbox"/>
All Other Audio	<input type="checkbox"/>
